Settings for resolv.conf

Below is the correct setting of the file **resolv.conf** so all the DNS request to resolve through the DNScrypt-proxy.
The file is locate at the **/etc/resolv.conf**
Open the terminal and type the below command :

```
nano /etc/resolv.conf
```

Remove EVERYTHING inside that file OR just COMMENT all the lines by adding [**#**] at the beginning of each line.
Add the line below by copy / paste it inside the file "**resolv.conf**"

```
nameserver 127.0.0.1
```

then press **Ctrl + x** it will prompt you [`Save modified buffer?`] press **y** and **enter**
