Notify Mobile App.

Notify Mobile App using image and button.

The below is a notification using the Android APP of Home Assistant to notify with an image from API of the camera or a photo from a screenshot saved local.

Camera API image.

```
action: notify.mobile_app_kostas
data:
  message: Αυτό είναι ένα μυνήμα.
  title: Κάποιος είναι στην αυλόπορτα.
  data:
    image: /api/camera_proxy/camera.garden_door
    entity_id: camera.garden_door
    actions:
      - action: URI
        title: Κάμερα
        uri: /lovelace-cameras/garden
      - action: URI
        title: Άνοιγμα Εικόνας
        uri: /media/local/camera/garden_door/person.jpg
```

Photo from screenshot saved local.

```
action: notify.mobile_app_kostas
data:
  message: Αυτό είναι ένα μυνήμα.
  title: Κάποιος είναι στην αυλόπορτα.
  data:
    image: /media/local/camera/garden_door/person.jpg
    entity_id: camera.garden_door
    actions:
      - action: URI
        title: Κάμερα
        uri: /lovelace-cameras/garden
      - action: URI
```

```
        title: Άνοιγμα Εικόνας
        uri: /media/local/camera/garden_door/person.jpg
```

File Location Mapping

The key difference is that /local/ maps to /config/www/ directory, while /media/local/ maps to /media/ directory

Physical Path	Notification Path	Usage
/config/www/file.jpg	/local/file.jpg	Public access, no auth required
/media/file.jpg	/media/local/file.jpg	Authenticated access, secure
Camera entity	/api/camera_proxy/camera.entity_id	Live camera proxy
