Debload Windows 10 and 11

Usage

> ⚠ **Warning**
> Great care went into making sure this script does not unintentionally break any OS functionality, but use at your own risk! If you run into any issues, please report them here.

Quick method

Download & run the script automatically via PowerShell.

1. Open PowerShell or Terminal, preferably as an administrator.
2. Copy and paste the command below into PowerShell:

```
& ([scriptblock]::Create((irm "https://debloat.raphi.re/")))
```

3. Wait for the script to automatically download Win11Debloat.
4. Carefully read through and follow the on-screen instructions.

This method supports command-line parameters to customize the behaviour of the script. Please click here for more information.
