RustDesk New client install or Upgrade.

Method one AUTO

Windows Script AUTO

The below script is for RustDesk Client for **NEW install** or **UPGRADE** or **configuring settings**.

Open a **Powershell as Administrator** and then copy / paste and run with the below command.

Run in **Powershell as Administrator :**

```
Set-ExecutionPolicy -ExecutionPolicy Bypass -Scope Process -Force; Invoke-Expression (Invoke-WebRequest -Uri "https://docs.greenhome.stream/attachments/21" -UseBasicP) | Out-Null
```

Done.

Method two MANUAL

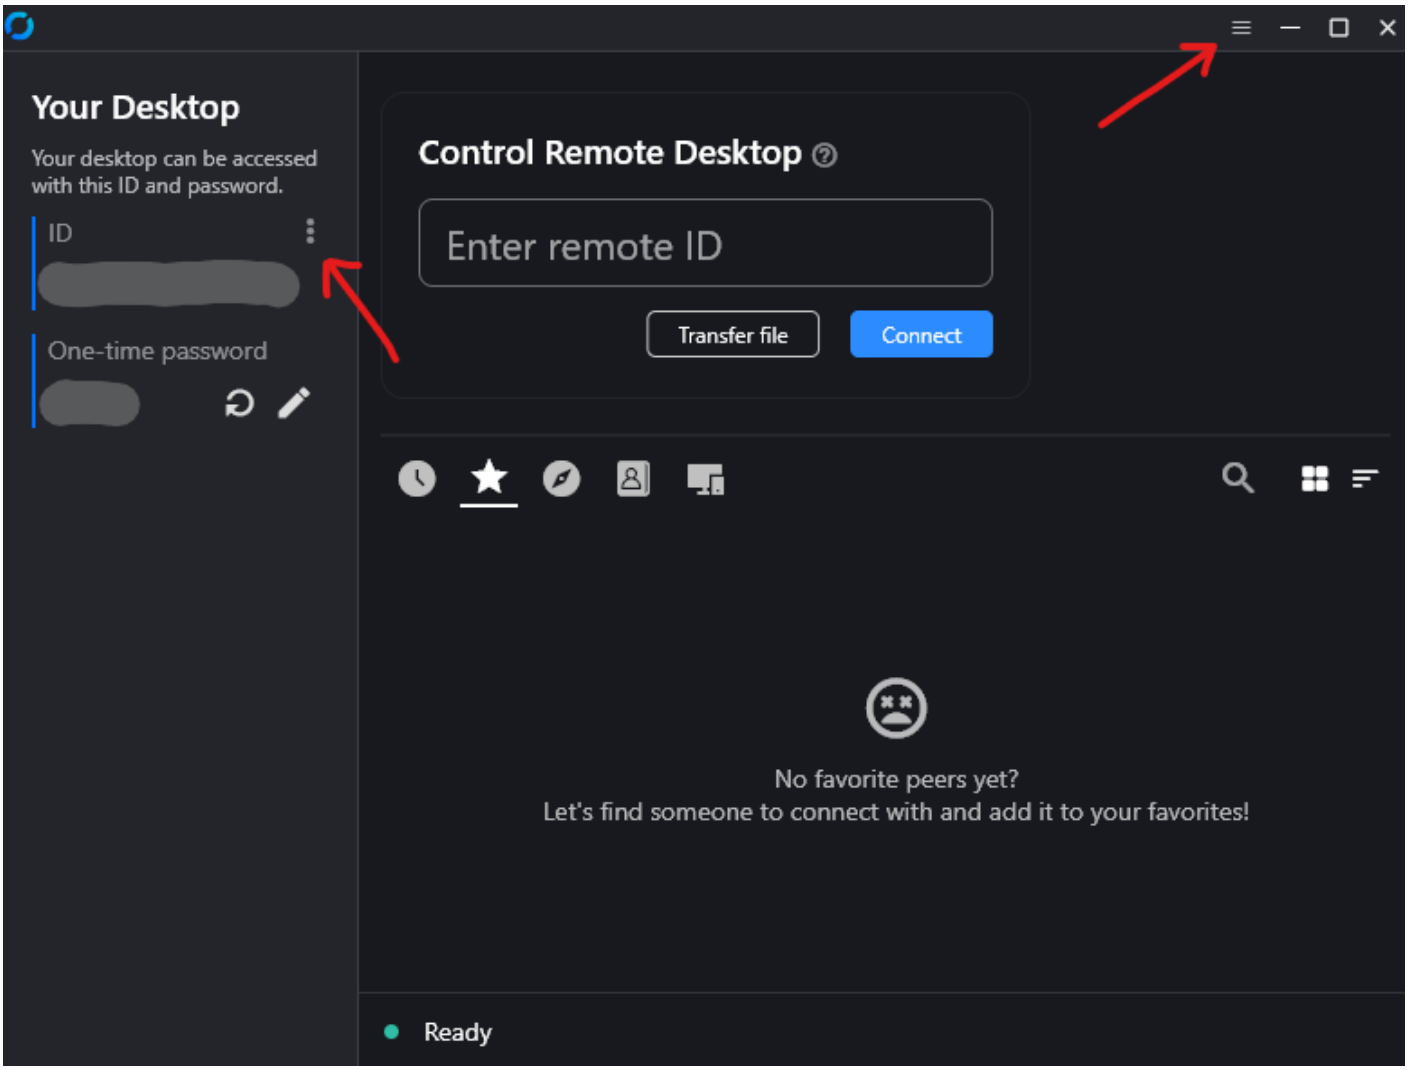

First install the Rustdesk client from the below official link.

https://rustdesk.com/download

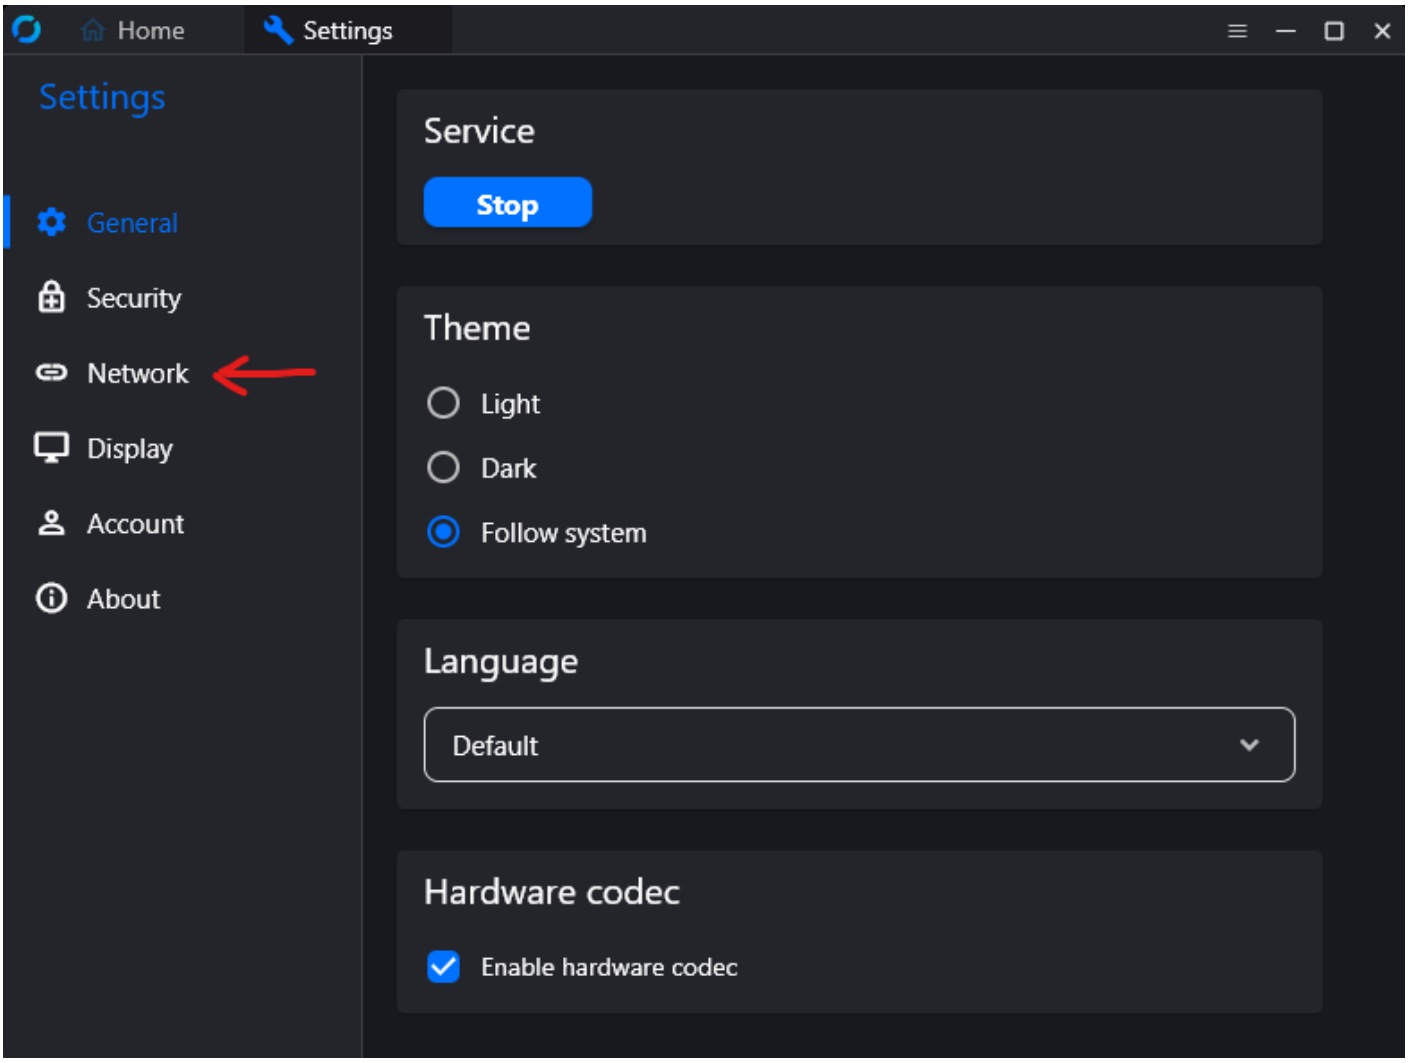

Windows guide setup.

To import the settings for ID/Relay follow the steps below.

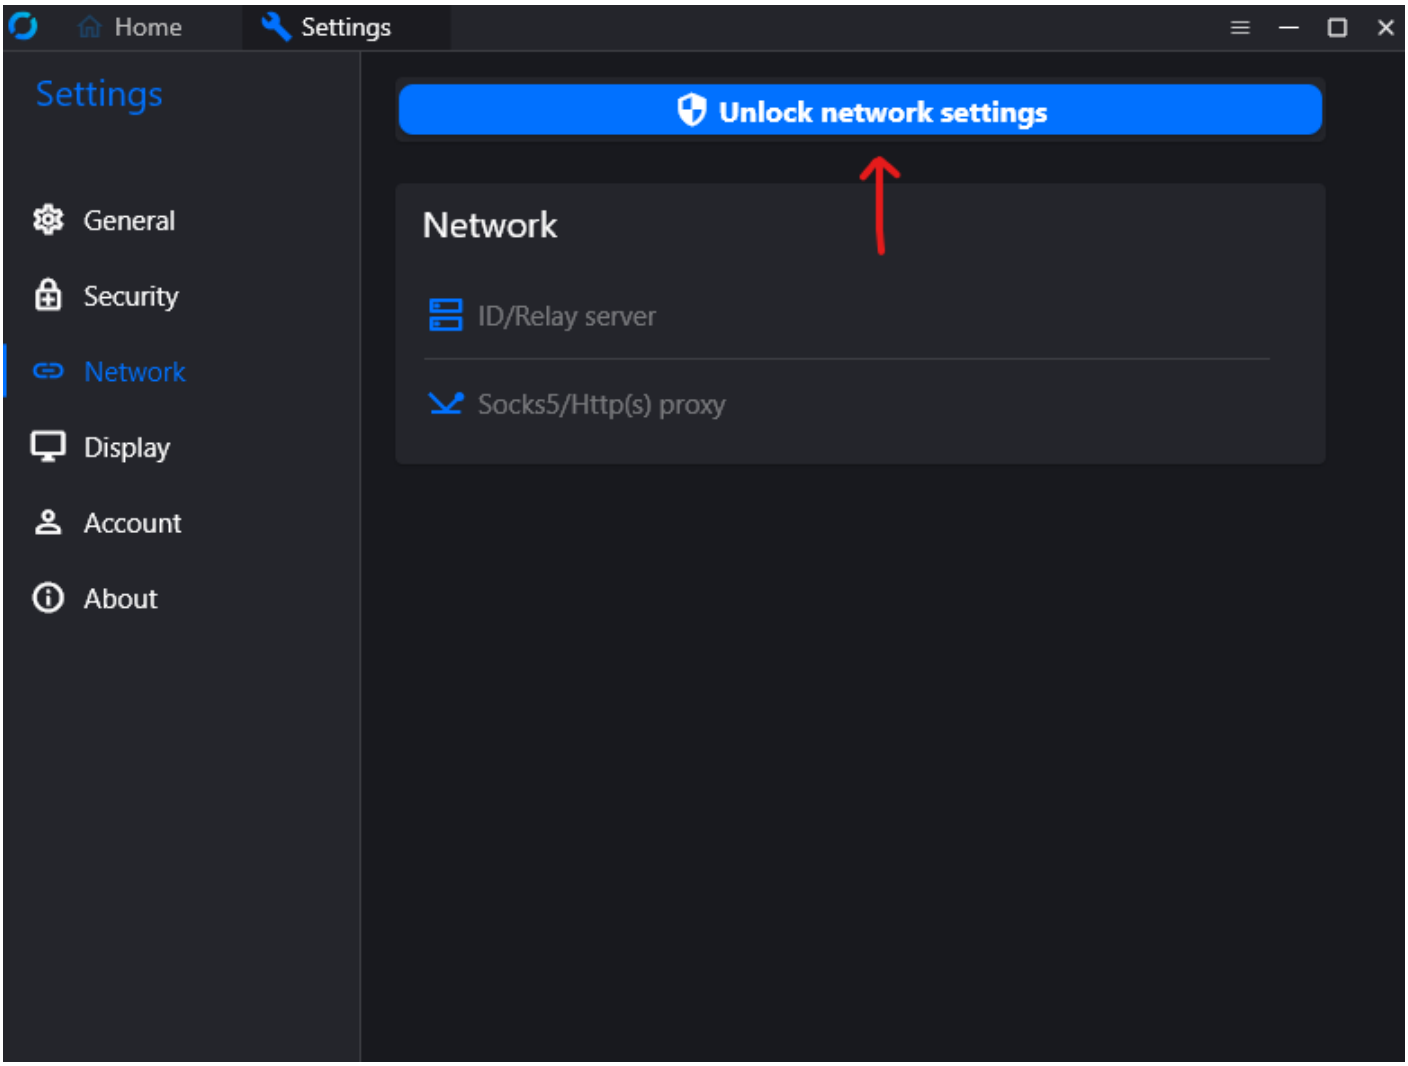

Step 1

Your Desktop
Your desktop can be accessed with this ID and password.
ID
One-time password
Control Remote Desktop
Enter remote ID
Transfer file
Connect

Step 2

Step 3

Copy the text below and paste it at the below button where the red arrow show.

```
9JiI6ISeltmIsIiI6ISawFmIsISbhVmc0NnLl12bo5WZlJ3Zus2clRGdzVnciojI5FGblJnIsISbhVmc0NnLl12bo5WZlJ
3Zus2clRGdzVnciojI0N3boJye
```

Android client check server connection.

RustDesk ports Allow from local subnet :

For full LAN direct connect (green status), also allow these inbound on target :

- TCP/UDP 21115-21117, 21118-21119 (RustDesk ports).

Use similar PowerShell :

Allow TCP Ports

```
New-NetFirewallRule -DisplayName "RustDesk TCP LAN" -Direction Inbound -LocalPort 21115-21119 -Protocol TCP -RemoteAddress LocalSubnet -Action Allow
```

Allow UDP Ports

```
New-NetFirewallRule -DisplayName "RustDesk UDP LAN" -Direction Inbound -LocalPort 21115-21119 -Protocol UDP -RemoteAddress LocalSubnet -Action Allow
```

You are ready.
